## Blocks and questions

### Block: Consent

consent_q · DB/TB

**Study information**

In this study you will make a series of quick choices between consumer products, shown a page at a time, plus a few short questions about the options. The whole study takes about 4 minutes.

Your responses are anonymous. We collect no personal information beyond the recruitment platform's identifier, which is used only to make sure each person takes the study once. You will be paid through the platform after you finish.

Taking part is voluntary and you can stop at any time. If you agree to take part, choose “Yes” below and click the arrow to begin.

Yes, I consent and wish to begin

No, I do not consent

Note: a page script runs on this page (for example, it draws the options from embedded data, or holds the Next button until an option is chosen).

browser_meta · Meta/Browser

(records the browser, operating system and screen size; not shown)

## Block: Instructions & attention

instructions · DB/TB

### How this task works

This is a short study about how people read product options. On each of the next ten pages you will see one shopping scenario with two options; imagine you are really shopping, and choose the **one** option you would pick. Each page is a different product. After the choices you will answer one quick question about a final set of options, and rate a few of the product pages you saw.

There are no right or wrong answers. Please read each option's details before answering. Click the arrow to begin.

page break

attention_1 · MC/SAVR/TX

To show you are reading carefully, please select **“Strongly agree”** below, regardless of your actual opinion.

1. Strongly disagree
2. Disagree
3. Neither agree nor disagree
4. Agree
5. Strongly agree

## Block: Choice slot 1 (backpacks)

timer_1 · Timing/PageTimer

(records the time spent on this page; not shown)

choice_1_q · DB/TB

Note: a page script runs on this page (for example, it draws the options from embedded data, or holds the Next button until an option is chosen).

## Block: Choice slot 2 (bluetooth_speakers)

timer_2 · Timing/PageTimer

(records the time spent on this page; not shown)

choice_2_q · DB/TB

Note: a page script runs on this page (for example, it draws the options from embedded data, or holds the Next button until an option is chosen).

## Block: Choice slot 3 (earbuds)

timer_3 · Timing/PageTimer

(records the time spent on this page; not shown)

choice_3_q · DB/TB

Note: a page script runs on this page (for example, it draws the options from embedded data, or holds the Next button until an option is chosen).

## Block: Choice slot 4 (electric_kettles)

timer_4 · Timing/PageTimer

(records the time spent on this page; not shown)

choice_4_q · DB/TB

Note: a page script runs on this page (for example, it draws the options from embedded data, or holds the Next button until an option is chosen).

## Block: Choice slot 5 (hard_drives)

timer_5 · Timing/PageTimer

(records the time spent on this page; not shown)

choice_5_q · DB/TB

Note: a page script runs on this page (for example, it draws the options from embedded data, or holds the Next button until an option is chosen).

## Block: Choice slot 6 (restaurants)

timer_6 · Timing/PageTimer

(records the time spent on this page; not shown)

choice_6_q · DB/TB

Note: a page script runs on this page (for example, it draws the options from embedded data, or holds the Next button until an option is chosen).

## Block: Choice slot 7 (robot_vacuums)

timer_7 · Timing/PageTimer

(records the time spent on this page; not shown)

choice_7_q · DB/TB

Note: a page script runs on this page (for example, it draws the options from embedded data, or holds the Next button until an option is chosen).

## Block: Choice slot 8 (standing_desks)

timer_8 · Timing/PageTimer

(records the time spent on this page; not shown)

choice_8_q · DB/TB

Note: a page script runs on this page (for example, it draws the options from embedded data, or holds the Next button until an option is chosen).

## Block: Choice slot 9 (televisions)

timer_9 · Timing/PageTimer

(records the time spent on this page; not shown)

choice_9_q · DB/TB

Note: a page script runs on this page (for example, it draws the options from embedded data, or holds the Next button until an option is chosen).

## Block: Choice slot 10 (water_bottles)

timer_10 · Timing/PageTimer

(records the time spent on this page; not shown)

choice_10_q · DB/TB

Note: a page script runs on this page (for example, it draws the options from embedded data, or holds the Next button until an option is chosen).

## Block: Geometry manipulation check

geo_timer · Timing/PageTimer

(records the time spent on this page; not shown)

geo_context_q · DB/TB

Note: a page script runs on this page (for example, it draws the options from embedded data, or holds the Next button until an option is chosen).

geo_dominance · MC/SAVR/TX

Look at the lettered options above. Is any one option clearly **worse than another option on every feature** listed? If so, which one?

1. Yes — Option A is clearly worse than another option on every feature
2. Yes — Option B is clearly worse than another option on every feature
3. Yes — Option C is clearly worse than another option on every feature
4. No — every option is better than each other option on at least one feature
5. I cannot tell

Note: shown only when its display condition holds.

geo_range · MC/SAVR/TX

Look at the three options above. On which feature do the options differ by the **widest** amount (the largest gap between the lowest and the highest value)?

1. The first feature
2. The second feature
3. The features differ by about the same amount
4. I cannot tell

Note: shown only when its display condition holds.

geo_phantom_comprehension · MC/SAVR/TX

One of the options above is marked **currently unavailable**. Compared with the other options, that unavailable option is:

1. Better on one feature and equal or worse on the rest
2. Worse on every feature
3. Exactly the same as another option
4. There was no unavailable option
5. I cannot tell

Note: shown only when its display condition holds.

geo_compromise_extreme · MC/SAVR/TX

Look at the lettered options above. Which option is the **most premium** one (the highest-end option, with the most capability at the highest price)?

1. Option A
2. Option B
3. Option C
4. I cannot tell

Note: shown only when its display condition holds.

geo_upscaling_symmetric · MC/SAVR/TX

Look at the three options above. Is any one option clearly worse than **both** of the other two options?

1. Yes, one option is worse than both of the others
2. No option is worse than both others
3. I cannot tell

Note: shown only when its display condition holds.

geo_tier_distinctness · MC/SAVR/TX

The options above fall into groups by quality level. How many **distinct** quality levels (tiers) do you see among the options?

1. One level
2. Two levels
3. Three levels
4. More than three levels
5. I cannot tell

Note: shown only when its display condition holds.

geo_clone_recognition · MC/SAVR/TX

Look at the three options above. Are any two of the options **nearly identical** to each other (almost the same on every feature)?

1. Yes, two options are nearly identical
2. No, all three options are clearly different
3. I cannot tell

Note: shown only when its display condition holds.

## Block: Realism check (invented categories)

rea_timer_1 · Timing/PageTimer

(records the time spent on this page; not shown)

realism_ctx_1 · DB/TB

Note: a page script runs on this page (for example, it draws the options from embedded data, or holds the Next button until an option is chosen).

realism_electric_kettles · MC/SAVR/TX

The product options above are from one of the choices you made earlier, shown again. How realistic do they seem to you — do they read like a **real product page** you might see when shopping online?

1. 1 - Not at all realistic
2. 2
3. 3
4. 4
5. 5
6. 6
7. 7 - Completely realistic

page break

rea_timer_2 · Timing/PageTimer

(records the time spent on this page; not shown)

realism_ctx_2 · DB/TB

Note: a page script runs on this page (for example, it draws the options from embedded data, or holds the Next button until an option is chosen).

realism_comments · TE/ML

Optional: if anything about the product pages in this study seemed unrealistic, confusing, or odd, please tell us here.

## Block: Demographics

gender · MC/SAVR/TX

What is your gender?

1. Woman
2. Man
3. Non-binary
4. Prefer not to say

age · TE/SL

What is your age (in years)?

## Block: Debrief

debrief · DB/TB

### Thank you

You have finished. This study helps us choose the product options for a later study by checking how people read them. Please do not share the specific options with future participants. Click the arrow to return to Prolific.
