consent_q · DB/TB

Study information

In this study you will make a series of quick choices between consumer products, shown a page at a time, plus a few short questions about the options you saw. The whole study takes about 5 minutes.

Your responses are anonymous. We collect no personal information beyond the recruitment platform's identifier, which is used only to make sure each person takes the study once. You will be paid through the platform after you finish.

Taking part is voluntary and you can stop at any time. If you agree to take part, choose “Yes” below and click the arrow to begin.

Yes, I consent and wish to begin

No, I do not consent

Note: a page script runs on this page (for example, it draws the options from embedded data, or holds the Next button until an option is chosen).

How this task works

This is a short study about how people read product options. On each of the next nine pages you will see one shopping scenario with two options; imagine you are really shopping, and choose the **one** option you would pick. Each page is a different product. After the choices you will answer a few quick questions about some further sets of options, and rate a few product pages.

There are no right or wrong answers. Please read each option's details before answering. Click the arrow to begin.

geo1_dominance · MC/SAVR/TX

Look at the lettered options above. Is any one option clearly **worse than another option on every feature** listed? If so, which one?

1. Yes — Option A is clearly worse than another option on every feature
2. Yes — Option B is clearly worse than another option on every feature
3. Yes — Option C is clearly worse than another option on every feature
4. No — every option is better than each other option on at least one feature
5. I cannot tell

Note: shown only when its display condition holds.

geo1_range · MC/SAVR/TX

Look at the three options above. On which feature do the options differ by the **widest** amount (the largest gap between the lowest and the highest value)?

1. The first feature
2. The second feature
3. The features differ by about the same amount
4. I cannot tell

Note: shown only when its display condition holds.

geo1_phantom_comprehension · MC/SAVR/TX

One of the options above is marked **currently unavailable**. Compared with the other options, that unavailable option is:

1. Better on one feature and equal or worse on the rest
2. Worse on every feature
3. Exactly the same as another option
4. There was no unavailable option
5. I cannot tell

Note: shown only when its display condition holds.

geo1_compromise_extreme · MC/SAVR/TX

Look at the lettered options above. Which option is the **most premium** one (the highest-end option, with the most capability at the highest price)?

1. Option A
2. Option B
3. Option C
4. I cannot tell

Note: shown only when its display condition holds.

geo1_upscaling_symmetric · MC/SAVR/TX

Look at the three options above. Is any one option clearly worse than **both** of the other two options?

1. Yes, one option is worse than both of the others
2. No option is worse than both others
3. I cannot tell

Note: shown only when its display condition holds.

geo1_tier_distinctness · MC/SAVR/TX

The options above fall into groups by quality level. How many **distinct** quality levels (tiers) do you see among the options?

1. One level
2. Two levels
3. Three levels
4. More than three levels
5. I cannot tell

Note: shown only when its display condition holds.

geo1_clone_recognition · MC/SAVR/TX

Look at the three options above. Are any two of the options **nearly identical** to each other (almost the same on every feature)?

1. Yes, two options are nearly identical
2. No, all three options are clearly different
3. I cannot tell

Note: shown only when its display condition holds.

Block: Picture comprehension

pic_context_q · DB/TB

Here is one of the pictures you saw earlier, shown again:

Note: shown only when its display condition holds; a page script runs on this page (for example, it draws the options from embedded data, or holds the Next button until an option is chosen).

pic_comprehension · MC/SAVR/TX

One of your earlier choices showed the options as a **picture** with bars instead of numbers; that picture is shown again above. According to the picture, which option has **more** of the quality feature shown by the **green** bars?

1. Option A
2. Option B
3. I cannot tell

Note: shown only when its display condition holds.

realism_ctx_1 · DB/TB

Note: a page script runs on this page (for example, it draws the options from embedded data, or holds the Next button until an option is chosen).

realism_electric_kettles · MC/SAVR/TX

The product options above are from one of the choices you made earlier, shown again. How realistic do they seem to you — do they read like a **real product page** you might see when shopping online?

1. 1 - Not at all realistic
2. 2
3. 3
4. 4
5. 5
6. 6
7. 7 - Completely realistic

page break

rea_timer_2 · Timing/PageTimer

(records the time spent on this page; not shown)

realism_ctx_2 · DB/TB

Imagine you are shopping for a robot vacuum. You are considering the following options: Which would you choose?

TidyBot Robot Vacuum
2,000 Pa suction — handles everyday dust and crumbs on hard floors
$159 — an entry-level price

OrbitClean Robot Vacuum
6,000 Pa suction — strong enough for carpets and pet hair
$499.99 — a flagship price

realism_robot_vacuums · MC/SAVR/TX

The product options above are from another product category in this study, shown the same way. How realistic do they seem to you — do they read like a **real product page** you might see when shopping online?

1. 1 - Not at all realistic
2. 2
3. 3
4. 4
5. 5
6. 6
7. 7 - Completely realistic

page break
